EXPERIMENT 9

Device-Specific Design and Mobile Access in Zoho Creator

1. Aim

To preview and verify the Parking Slot Booking System application on different device layouts using Zoho Creator.

2. Objective

- To view the application in Laptop, Phone, and Tablet previews.
- To check the layout and readability of the application on different screen sizes.
- To understand how Zoho Creator supports access across different devices.

3. Software Required

- Zoho Creator
- Web browser
- Parking Slot Booking System application

4. Procedure

1. Logged in to Zoho Creator using the registered account.
2. Opened the Parking Slot Booking System application.
3. Navigated to the device preview section.
4. Selected the Laptop preview and inspected the application layout.
5. Selected the Phone preview and checked the layout on a smaller screen.
6. Selected the Tablet preview and inspected the arrangement of the application components.
7. Compared the appearance of the application across all three device previews.
8. Observed that the application layout looked good in all three previews.

5. Observation

The Parking Slot Booking System was previewed in Laptop, Phone, and Tablet layouts. The application appeared visually good across all three device previews.

6. Result

The Parking Slot Booking System was successfully previewed on Laptop, Phone, and Tablet layouts using Zoho Creator. The application displayed a satisfactory layout across the three device previews.
