EXPERIMENT 11

Deploying a Zoho Creator Application from Development to Production Environment

Application Name: Parking Slot Booking System
Platform: Zoho Creator

1. Aim

To deploy the Parking Slot Booking System from the Development environment to the Production environment using Zoho Creator's environment deployment workflow.

2. Software Requirements

- Zoho Creator
- Web browser
- Parking Slot Booking System application

3. Theory

Zoho Creator provides environments to develop, test, and publish applications.

- **Development:** Used to create and modify application components.
- **Stage:** Used to test the application before production deployment.
- **Production:** Used to provide the published application to its intended users.

Deploying through Stage helps verify the application before making it available in Production.

4. Procedure

Step 1: Open the Application

1. Log in to Zoho Creator.
2. Open the Parking Slot Booking System application.
3. Verify that the forms and reports are available in Development.

Step 2: Publish to Stage

1. Navigate to Deploy → Environments.
2. Click Publish and select the option to publish to Stage.
3. Review the application components and version details.
4. Initiate the Stage publishing process.

5. Monitor the deployment status on the Environments page.

Step 3: Test the Stage Application

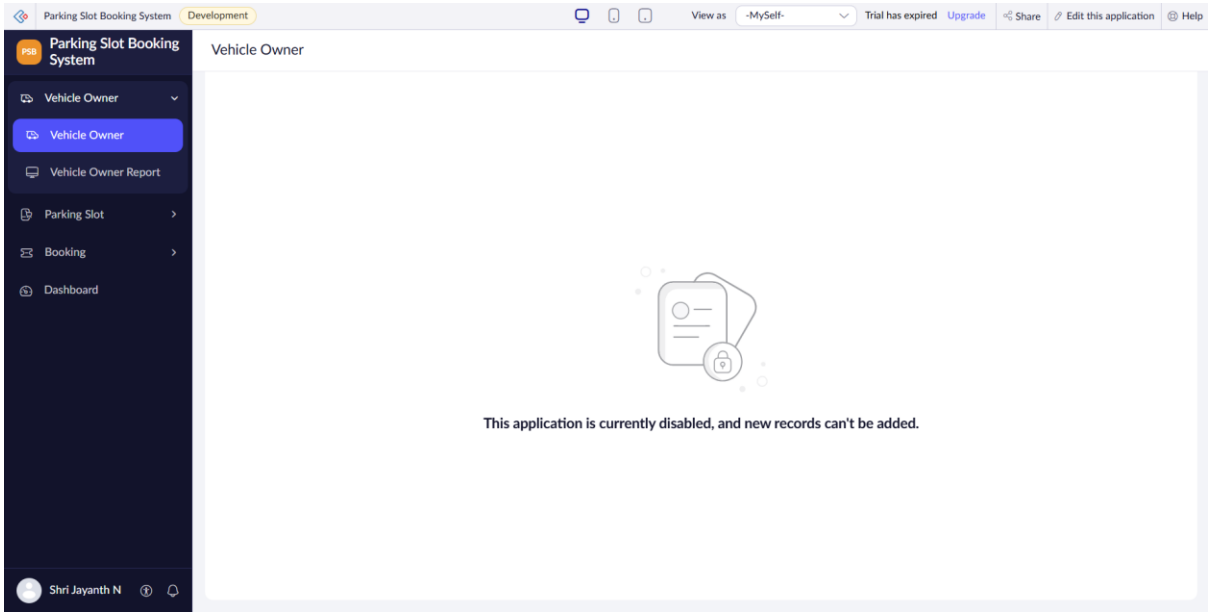

1. Open Stage Live after publishing completes.
2. Verify that the Parking Slot form opens.
3. Verify that the Booking form opens.
4. Open the Parking Slot Report and check the displayed records.

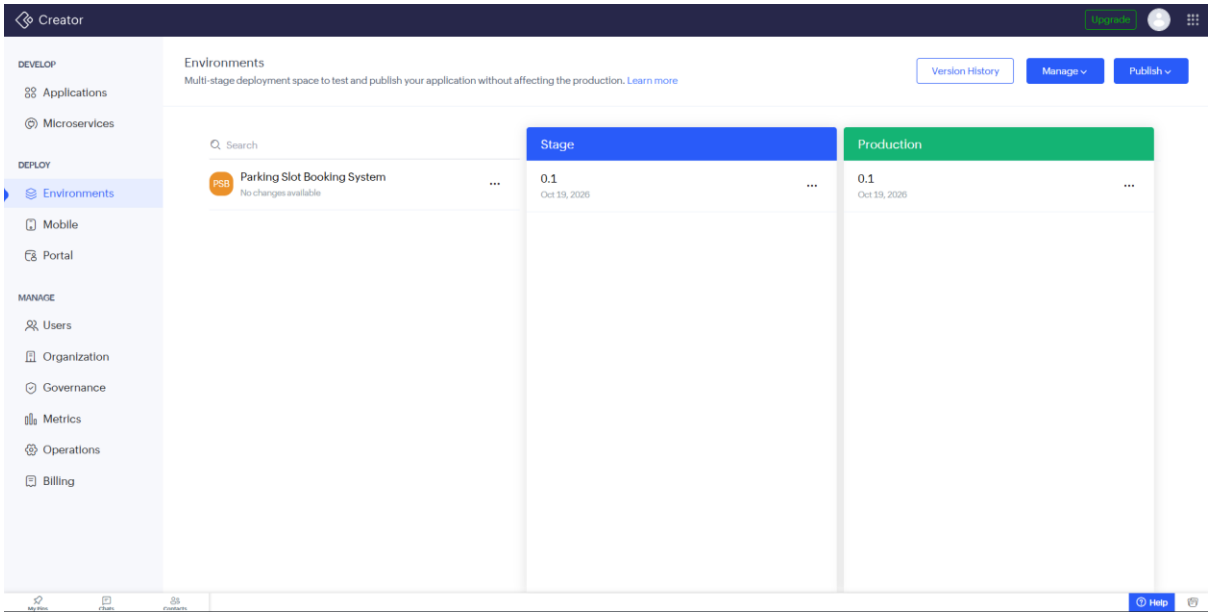

Step 4: Publish to Production

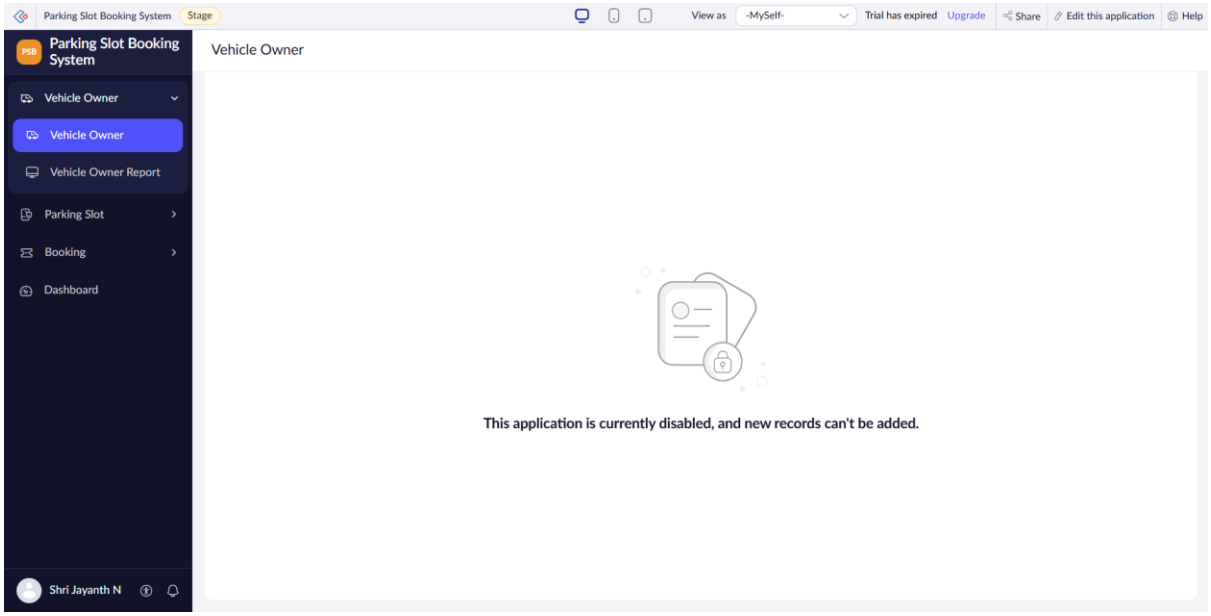

1. Return to Deploy → Environments.
2. Click Publish and choose Publish to Production.
3. Select the appropriate tested version when prompted.
4. Review the components and version details.
5. Confirm the Production publishing process.

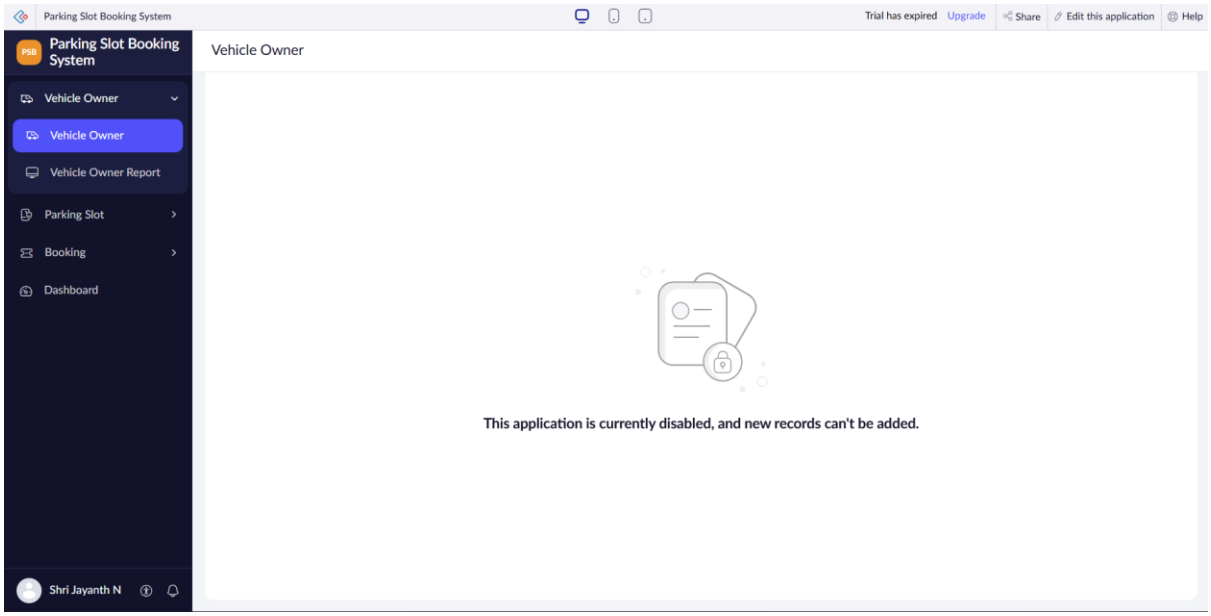

Step 5: Verify Production

1. Check the Production deployment status.
2. Open Production Live after publishing completes.
3. Verify that the Parking Slot form, Booking form, and Parking Slot Report open correctly.

This application is currently disabled, and new records can't be added.

5. Result

The Parking Slot Booking System was deployed from Development to Stage and subsequently published to Production. The application forms and report were tested in Stage. Production functionality was to be verified after publication.

6. Conclusion

The experiment demonstrates the deployment workflow in Zoho Creator. Testing the application in Stage before publishing to Production helps identify issues and reduces the risk of deploying unverified changes.
